Chapter 2

File Documentation

2.1 /home/marques/Desktop/Cesium/DPUM/5_smooshed_morse_code/medium/code_
golf/Marquinhos87/C/src/morse.h File Reference

```
#include <stdlib.h>
#include <stdio.h>
#include <string.h>
Include dependency graph for morse.h:
```

Functions

- char translateToChar4 (char *c)
- char translateToChar3 (char *c)
- char translateToChar2 (char *c)
- char translateToChar1 (char *c)
- void prt (char *I, char *t)
- int translate (char *I)

4 File Documentation

2.1.1 Function Documentation

2.1.1.1 prt()

```
void prt ( \label{eq:char} \operatorname{char} \ * \ l, \label{eq:char} \operatorname{char} \ * \ t \ )
```

Function to print to stdout the result translation.

Parameters

1	String of Morse Code to translation.
Is	String with translation.

2.1.1.2 translate()

```
int translate ( {\tt char} \, * \, {\tt 1} \, )
```

Function that calls the others to generate de final result.

Parameters

String for translation.

Returns

Return 0 if alright OK or 1 if something wrong

2.1.1.3 translateToChar1()

```
char translateToChar1 ( char * c )
```

Function that translate morse code to character (with length 1).

Parameters

c Character to converte to morse code.

Reference 5

String with morse code of the character

2.1.1.4 translateToChar2()

```
char translateToChar2 ( {\tt char} \, * \, c \, )
```

Function that translate morse code to character (with length 2).

Parameters

c Character to converte to morse code.

Returns

String with morse code of the character

2.1.1.5 translateToChar3()

```
char translateToChar3 ( char * c )
```

Function that translate morse code to character (with length 3).

Parameters

c Character to converte to morse code.

Returns

String with morse code of the character

2.1.1.6 translateToChar4()

```
char translateToChar4 ( char * c )
```

Function that translate morse code to character (with length 4).

File Documentation

Parameters

c Character to converte to morse code.

Returns

String with morse code of the character
